

Description détaillée du projet

Titre du projet	The "Ten Sixty Swiss" study A 10/66 epidemiological study into dementia and its impact in Switzerland
Langue du projet	English, French, Italian, German
Institutions	Università della Svizzera Italiana
Mots-clés	Dementia; epidemiology; cohort study;
Espace géographique	Ticino; Geneva; Zurich
Question(s) de recherche	Is the so called 1066 2.0 methodology valid, feasible, acceptable, and scalable to conduct modern populational epidemiological studies into dementia and its impact in Switzerland?
Objectif(s) de recherche	<ul style="list-style-type: none"> • To Develop and implement a 1066 2.0 epidemiological research platform in the Swiss national language • To validate the 1066 2.0 short schedule dementia diagnostic algorithm
Méthode	Quantitative- Population-based epidemiological study
Pertinence	Dementia is a global public health priority. Epidemiological data are crucial and indispensable to inform the public health response. In Switzerland the epidemiological evidence on dementia is extremely sparse, and outdated.
Direction du projet	Prof. Emiliano Albanese – USI, Lugano
Équipe de projet	<ul style="list-style-type: none"> • Dr.ssa Myriam Thoma - UZH • Prof. Frisoni – Université de Genève • Dr. Leonardo Sacco – EOC Ticino • Dr. Rafel Traber – OSC Ticino
Institution(s) mandante(s)	Università della Svizzera Italiana - USI
